

BriefKeeper

From conversation to clarity.

An editable creative brief, connected to the words that shaped it. Built for people who need to agree on the work before they begin.

01 / VOICE

02 / EVIDENCE

03 / REVIEW

01 / A FAMILIAR PROBLEM

The request changes. The record should follow.

A good briefing is more than a transcript. A team needs to see the current agreement, the original statement and the questions still unanswered.

Designed from a creative director's workflow:
listen carefully, expose uncertainty, then review.

FIRST REQUEST

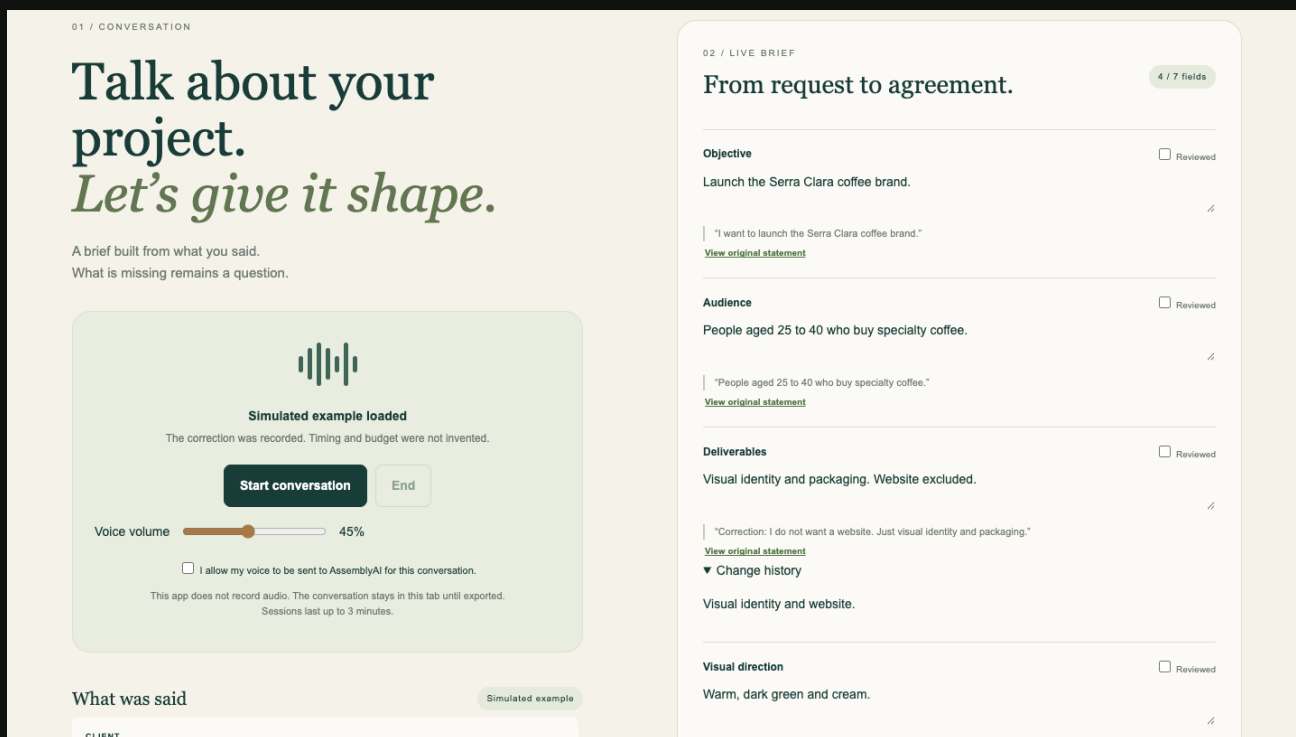

"A visual identity and a website."

CORRECTION

"No website. Just identity
and packaging."

02 / THE WORKING PRODUCT

Speak. Check. Keep the source.

Seven editable fields.

A quote beside each extracted decision.

A correction history that preserves the earlier request.

ACTUAL APP CAPTURE / FICTIONAL EXAMPLE / NO LIVE API CALL IN THIS WALKTHROUGH

03 / A DECISION YOU CAN TRACE

Current value. Original words. Human review.

01 / LISTEN

AssemblyAI powers the voice interview in the competition version.

02 / TRACE

Each proposed field must cite an exact matching statement from the user transcript.

03 / REVIEW

Edit the brief, inspect the source and export the agreement with its history.

Exact quotation checks verify the source of a statement, not whether an interpretation is correct. Review remains necessary.

04 / VISIBLE EVIDENCE

Show the workflow. Be precise about the proof.

Recorded AssemblyAI session

The preserved original recording uses synthetic Portuguese test speech and produces a brief. The new narrated walkthrough is a separate fictional example.

Revision checks

12 automated test entries passed, plus nine browser verification groups: correction history, original evidence, review, export, six interface languages and mobile layout.

No new paid voice session was invoked for this revision. Current key validity, provider balance and physical microphone quality are not certified by these tests.

05 / TWO EDITIONS, CLEAR EXPECTATIONS

Choose the right version.

COMPETITION

AssemblyAI voice interview

A conversational voice agent, exact-quote field updates and spoken replies.

Reviewer access code and consent required for live voice; up to three minutes per session. Provider access is required.

FIGUEIRA SAMPLE

Guided brief, local transcription

Type answers or transcribe short recordings on your device after downloading the speech model.

No paid API key. Guided topics, editable answers and export. It is not a full meeting recorder or the same conversational agent.

06 / TRY IT YOURSELF

A better beginning for the next project.
